

LogSentinel helps a large digital transformation provider with passing an audit

Business challenge

A large multinational digital transformation provider requires a **compliance solution** for financial, procurement and HR systems for which there's an **upcoming audit**. The audit requires full audit trail on all operations, as well as guarantees on the integrity of the audit trail.

The setup and integration has to be done on-premise and in a short timeframe and the solution has to allow the compliance team to be notified on irregularities in the monitored systems.

Solution

LogSentinel SIEM is integrated with the required systems to track all actions performed in them. The **audit trail** is used to make sure the audit is successful.

The **immutability** and **anomaly detection** provided by the solution give the compliance and IT security departments confidence about future audits as well.

Key **Benefits**

01

COMPLIANCE

Allowing large organizations to pass sophisticated internal and external audits

02

IMMUTABILITY

Guaranteeing the integrity of the audit log and protecting it from tampering from privileged users

03

DETECTION

Rule-based fraud detection that allows business stakeholders to detect insider threats

About LogSentinel

LogSentinel is an innovative company that takes compliance and information security to the next level with cutting edge technologies

Audit trail

Store and analyze every business-relevant event

Anomaly detection

Detect fraudulent and other anomalous behavior by people and systems

Integrity protection

Immutable, secure and provable to 3rd parties
